Introduction
Pascal Kiener, CEO

FY 2022 financial results Thomas W. Paulsen, CFO **Conclusion Pascal Kiener, CEO**

Swiss and Vaud GDP growth

- In 2022: inflation, rising interest rates and the geopolitical situation weighed on growth estimates, which were progressively revised downwards
- In 2023: lower growth but no recession expected

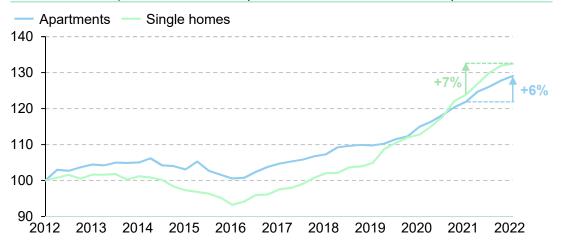

Note

- (1) SECO = Switzerland's State Secretariat for Economic Affairs
- (2) CREA = Lausanne University's Créa Institute of Macroeconomics

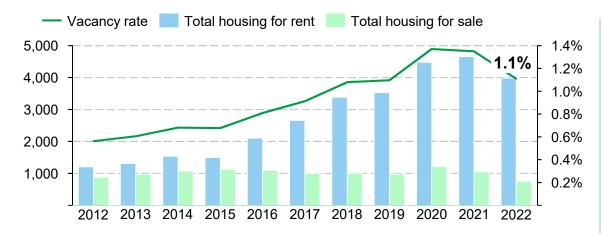

Real estate in Vaud

Transaction prices in Vaud (Basis 100 in Dec. 2012)

Vacant housing in Vaud

Note Source: Wüest Partner, Statistique Vaud

- Continuing increase in Vaud real-estate transaction prices since 2017, with a slight deceleration in recent months
- Still dynamic real-estate market in 2022
 - Transaction prices up 6% on apartments
 - Transaction prices up 7% on single-family homes
- Population growth of 1.1% in 2021, mainly driven by immigration (foreign + other Swiss cantons)
- In 2022, the vacancy rate has ticked lower
- BCV's mortgage policy remains unchanged:
 - Focused on loan quality instead of volume growth
 - Targets areas with low vacancy rates
- Slightly reduced volume growth going forward on higher interest rates

2023 Outlook

Easing pressure on income as interest rates return to positive territory, but financial markets still gloomy and uncertain and Trade Finance activity reduced due to the geopolitical situation

Business activity in line with previous years, provided the macro environment and financial markets do not change significantly

Continued firm control of operating expenses
